

Easy ways to make your house greener

Save your money and the planet

Start with what nature gives you for free

Harvest the skies

Collecting and using rainwater can lead to a healthy drop in your water bills.¹

Sun worship

A 2kW system costs around \$5000 to install and cuts 30 per cent from your power bill, saving around \$150 each quarter on a \$500 bill. It would take you something like 8 years (34 quarters) to pay off the installation, but it's free.²

Plants, not machinery...

They look beautiful and purify the air by converting carbon dioxide into delicious free oxygen. Plus you can put edibles in and supply delicious things for dinner - you've got to love that.³

Build green savings into the house itself

Get economy out of your electricity use
